NSF/ANSI Standard 61

NSF/ANSI Standard 61 is a standard defining the requirements for products that are destined for use in drinking water systems. In summary, the standard requires immersion testing of all products that will come into contact with drinking water for any elements (i.e., lead, mercury, cadmium, etc.) that may leach into the water that passes through the product. Many of Hayward's standard products underwent testing to this standard in 2007, and are now NSF listed products. Hayward's products that are NSF 61 listed can easily be found on the NSF website, www.NSF.org.
